Videos make great storytellers. They make information more digestible and easier to understand. That's why marketers are trying to use video as much as possible. It makes it easier to sell your brand or you personally. Video allows you to be concise and capture viewers' interest in the first few seconds. Social media success lies in your ability to condense information down into easily digestible snippets of content that is long enough to maintain viewers' attention but short enough to leave them wanting more.

### ***Need more reasons to use video?***
